

2019

ADULT PRE-APPRENTICESHIP

PROGRAM DESCRIPTION

The program is designed to replicate a real-work environment with 80% hands-on training and allows students to learn foundational skills needed in the Advanced Manufacturing industry and to "explore" the top local career tracks needed; including Machinist (CNC), Tool & Die Maker, Mechatronics, Electronics and Industrial Maintenance. In addition, you will get to try your hand a welding, plasma cutting, robotics and many other exciting projects. Based on your interest, skill level and instructor assessments, adults who successfully complete the pre-apprenticeship program have the opportunity for job placement in paid jobs and/or paid apprenticeships within four to six months. Placements are based on market availability and student's successful completion of the program.

WHAT YOU WILL LEARN

Fundamentals:

- ✓ Blueprint Reading
- ✓ Measurement
- ✓ Layout
- ✓ Hand Tools
- ✓ Drill Press
- ✓ Intro to Welding & Plasma Cutting
